<b>Table 1: Alert message Forms .....</b>	28
<b>Table 2: Nav Hover effect .....</b>	29
<b>Table 3 : Internal and External link .....</b>	30

## 1. Introduction

### **1.1 Website**

A website is a collection of files accessed through a web address, covering a particular theme or subject and managed by a particular person or organization.

### **1.2 Web pages**

A web page is a document for the world wide web(WWW) that is identified by a unique uniform resource locator(URL).

A web page can be accessed and display on a monitor or mobile device through web browser.

## 2. Introduction to my project

A printer is a peripheral device that produces a hard copy (physical representation) of electronic or digital documents, images, or other content stored on a computer or other digital devices.

It is e-commerce website where we sell different types of physical goods, services, and digital products(Printer) over the internet rather than at a brick-and-mortar location. Through an e-commerce website, a business can process orders, accept payments, manage shipping and logistics, and provide customer service.

## 3. Goals and objectives

The goals and objectives to make this website are: -

- understanding of the basic internet technologies and the impacts that the internet has made in their daily lives.
- Competency in designing a website with appropriate tools and technologies.
- Capabilities of applying scripting languages to web pages.
- Understand the structure of the website and simple navigation.
- Awareness of website design considerations: e.g. usability and accessibility.

*Figure 1: Goals and objectives*

## 4.How HTML, CSS and JS was used while developing website

### 4.1 HTML

HTML stands for Hyper Text Markup Language. HTML is the standard markup language for creating web pages. HTML is used to create webpages but does experience limitations when it comes to fully responsive components. Therefore, HTML should only be used to add text elements and structure them within a page.

HTML is the foundation that holds all the content and design elements together, allowing developers to define and organize content, and forming the basis for further enhancements with CSS and JavaScript.

Figure 2: HTML

### 4.2 CSS

CSS stands for Cascading Style Sheets. CSS is a computer language for laying out and structuring web pages. This language contains coding elements and is composed of these “Cascading Style Sheets” which are equally called CSS files.

CSS is used to style and layout web pages – for example, to alter the font, color, size, and spacing of the content, split it into multiple columns or add animations and other decorative features.

Figure 3: CSS

### 4.3 JavaScript

JavaScript is a lightweight interpreted (or just-in-time compiled) programming language with first-class functions. While it is most well-known as the scripting language for web pages, many non-browser environments also use it.

JavaScript is a scripting or programming language that allows me to implement complex features on web pages – every time a web page does more than just there and display static information for me

Figure 4: JavaScript

## Introduction of Information System

to look at – displaying timely content updates, interactive maps, animated 2D/3D graphics, scrolling video jukeboxes.

### 5.Verdict/ challenge

- Difficulty to manage time schedule and place
- Lack of coordination
- Difficulty to send code from friend to friend
- Distribution task
- Mismatching of task

Figure 5:Challenge

### 6.Discussion and Analysis

Firstly, I thought it is easy to make website then I realize it is too hard to work on HTML, CSS, JavaScript. It is a group work where as a team leader I distribute the task between the team member. In the Beginning, we were new friend, we haven't good coordination and good communication. Secondly, we have different perspective and many ideas that doesn't work at us but day by day we worked on that and solve the problem and worked on it. All the group member are very kind and talented and they just support me every sec and everywhere.

## 6. Selected Text Editor

### VS code

Visual Studio is a free and open-source code editor developed by Microsoft. Visual Studio Code is a streamlined code editor with support for development operations like debugging, task running, git integration, integrated terminal and version control.

#### 6.1 Use of text editor

##### VS code

Visual Studio Code is a versatile code editor used by developers for a variety of programming tasks. Basically I used VS code for making website where I used HTML, JavaScript, CSS and so on. In VS code I used HTML where I do structuring web content, creating Hyperlinks, Embedding Media, Forms and User input, Semantic Markup, Responsive Design and so on. In VS code I used CSS where I do Styling HTML elements, layout and positioning, Typography, colors and backgrounds and also I used JavaScript for sliding the pictures and form validations.

Figure 6: VS code

## 7.Creation of wireframe

### 7.1 Balsamiq

Balsamiq is a web-based user interface design tool for creating wireframes (sometimes called mockups or low-fidelity prototypes). It is used to generate digital sketches of the idea or concept for an application or website, and to facilitate discussion and understanding before any code is written.

Figure 7: Balsamiq

## 8.Name of pages

**8.1 Home Page:** - A home page is the primary web page that a visitor will view when they navigate to a website via a search engine, and it may also function as a landing page to attract visitors.

In my home page, there are navigation bar where we include product, research, blog and about us and also include partnership brand and some product of printer.

**8.2 Product Page:** - A page on a company website that showcases the product inventory a customer is able to buy.

In my product page, we include lots of printer from lots of brand such as HP, canon, Brother and Samsung and also include Accessories. It is a e-commerce website where we sell variety of printer in reasonable price.

**8.3 Research Page:** - A piece of academic writing that provides analysis, interpretation, and argument based on in-depth independent research.

In my research page, I just do comparision between my pages and references pages.

**8.4 Blog Page:** - A frequently updated webpage used personal commentary or business content.

In my Blog page, I just gave information about technology, negative impact of technology, positive impact of technology and importance of technology.

**8.5 About us:** - A section on a website that provides information about a company, organization, or individual personality.

In my About us page, I just gave information about my all team member and their qualification and their hobbies and so on.

## 9. Screenshot of Wireframe

### 9.1 Home page

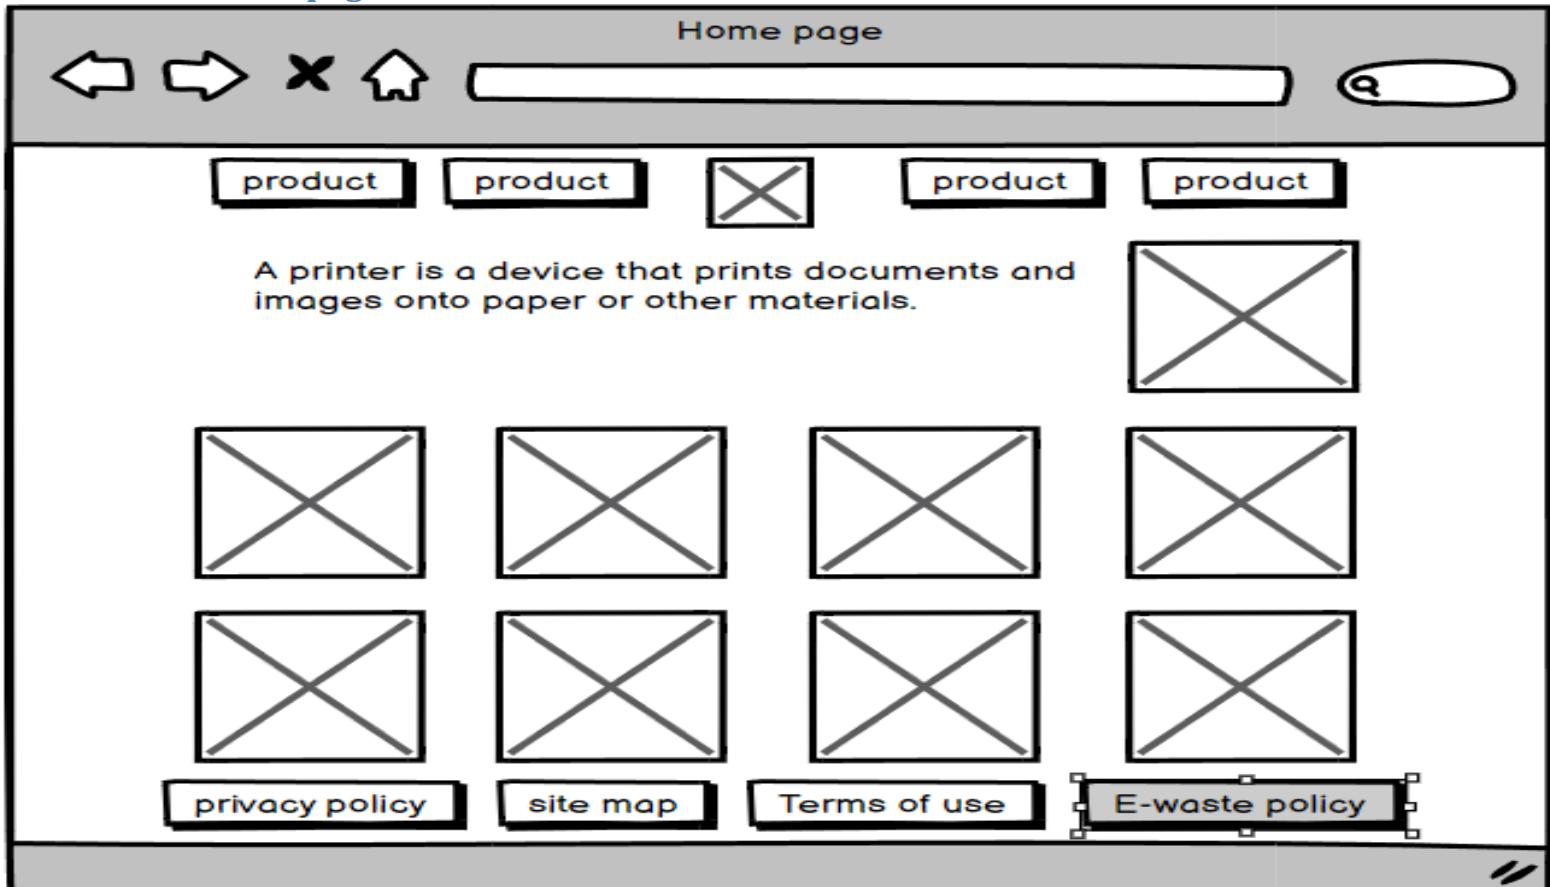

Figure 8: Home page

## 9.2 Product page

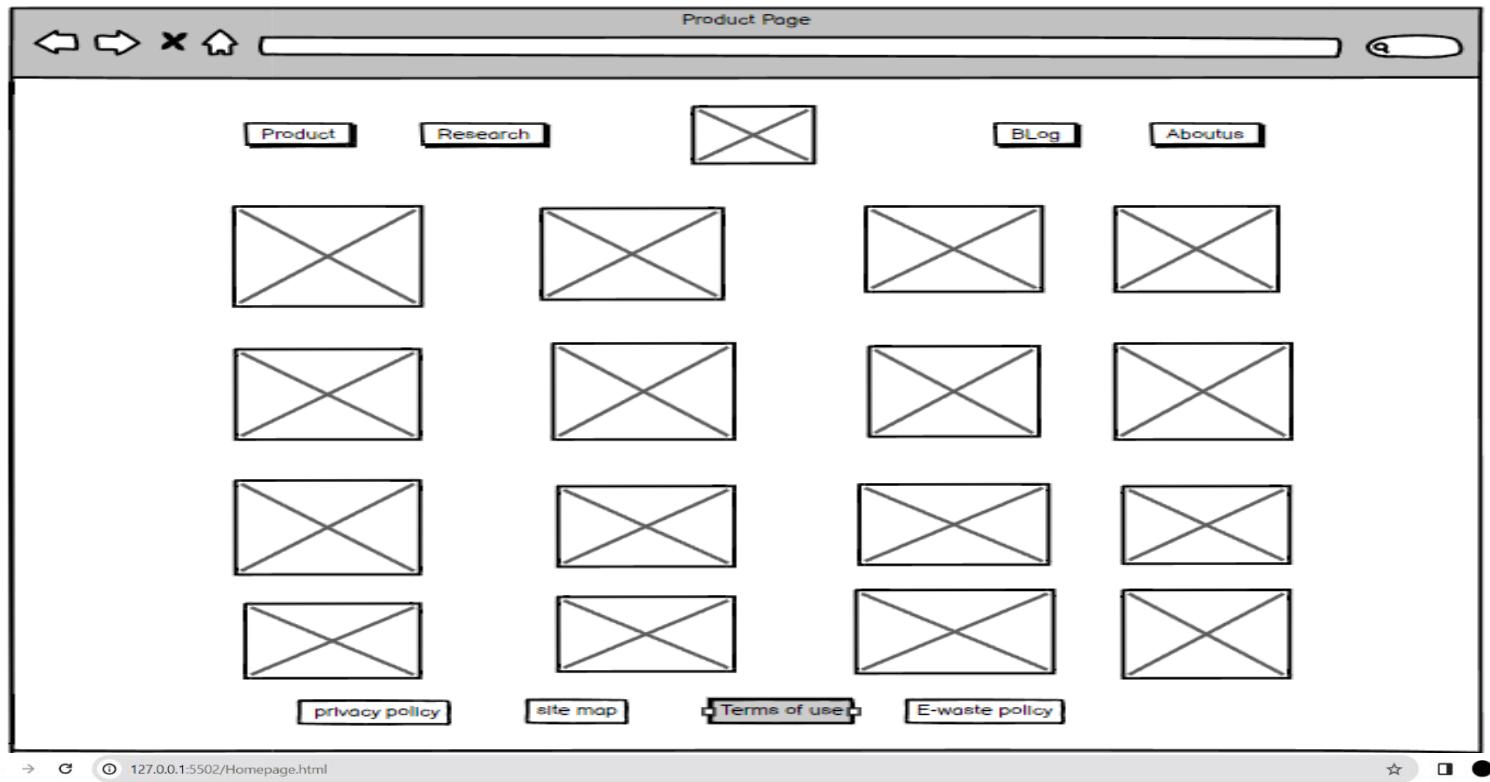

Figure 10: wireframe product page

Figure 9: product page

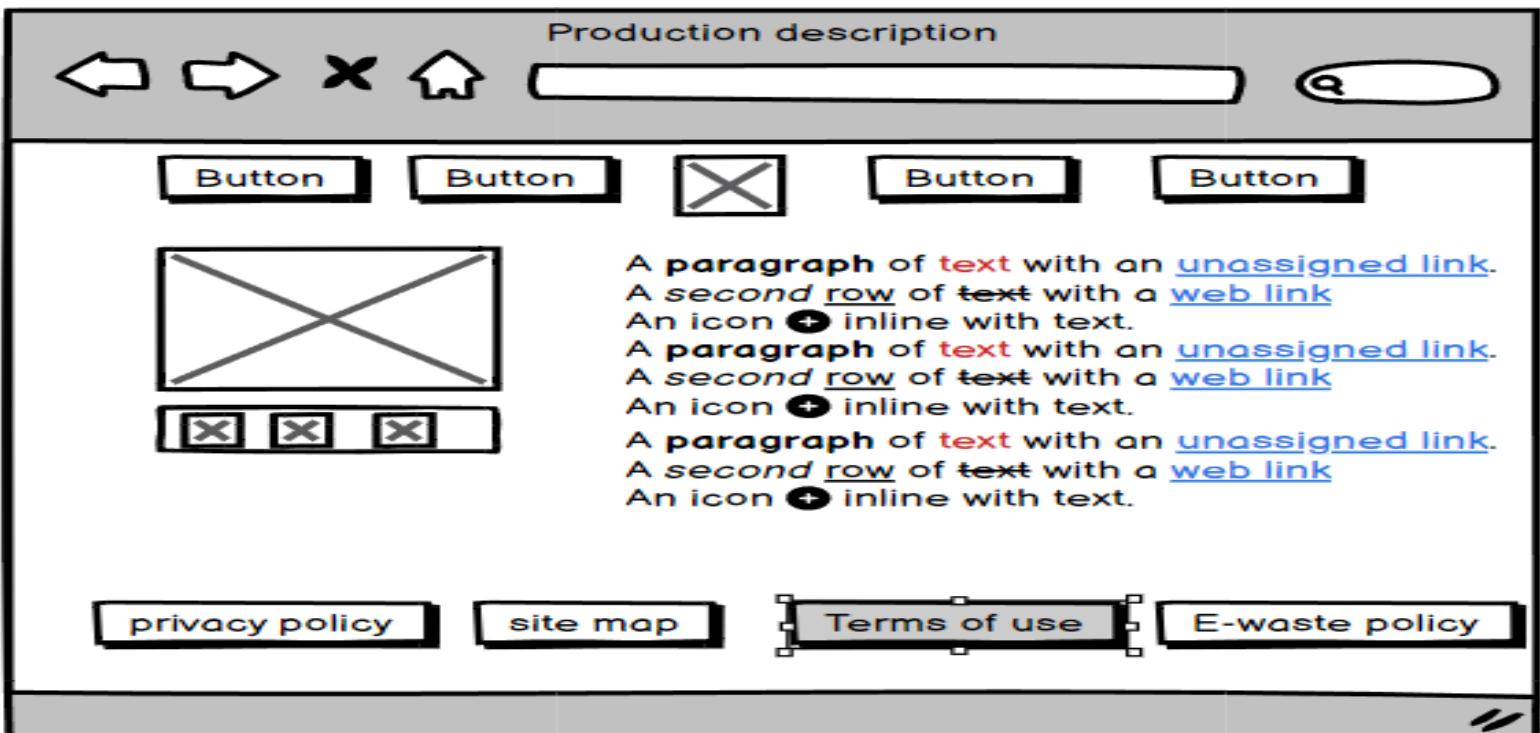

Figure 11: wireframe productiondescription

The product description page features a dark header with navigation links for 'Products', 'Research', 'Blog', and 'About us'. The main content area highlights the 'Brother MFC-L8900CDW Business Color Laser All-in-One Printer, Amazon Dash Replenishment Ready'. It shows a large image of the printer and several smaller images below it. The price is listed as '\$699.00 USD' and '\$599.00 USD'. A detailed table provides technical specifications: Brand (Brother), Connectivity (Wired, WI-FI), Printing Technology (Laser), Special Feature (USB Host to print from scan to your USB flash memory card, 70-page Auto-Document Feeder, 5.0" Color Touchscreen display, NFC, Print from Scan to Cloud Services, super high-yield replacement cartridges), Color (White), Model Name (MFCL8900CDW), and Printer Output (Color). Below the table is a section titled 'About This Item' with bullet points: 'Sold as 1 Each.' and 'Fast, high-impact color printing and copying at up to 33ppm.'

## 10. Testing

### 10.1 Test No 1

Objective	Alert message if the form is not fullfill
Action	Name=[“Forms”][“name”] E-mail=[“Forms”][“email”] Contact=[“Forms”][“contact”] Feedback=[“Forms”][“feedback”]

The screenshot shows a resume website for Kishor Baka Magar. At the top, there is a navigation bar with links for Products, Research, Blog, and About us. The main content area starts with a "Personal Overview" section featuring a circular profile picture of Kishor Baka Magar. Below this, the "Education" section lists his academic history from 2020 to 2023. The "Skills" section details his programming languages (Java, C, C++) and basic skills (HTML, CSS, JavaScript, DBMS, Concepts and SQL). The "Extra Curricular Experience & Awards" section includes entries for his participation in the School Soccer Team, Community Service, and Multi-Sport Participation. The "INTERESTS" section lists his hobbies (Football, Futsal, Video gaming, Hiking, Listening Music) and interests (SPORTS, TRAVEL, Coding, WRITING LEARNING). At the bottom, there is a "Connect with me via" section with icons for LinkedIn, Facebook, and Instagram, and a copyright notice for ePrintEmporia.

Figure 27: About us CV

## Introduction of Information System

Expected Result	If the form is not fill the alert message came.
Acutal Result	Form is not fully complete the alert message popup
Test	The test was sucessful

Table 1: Alert message Forms

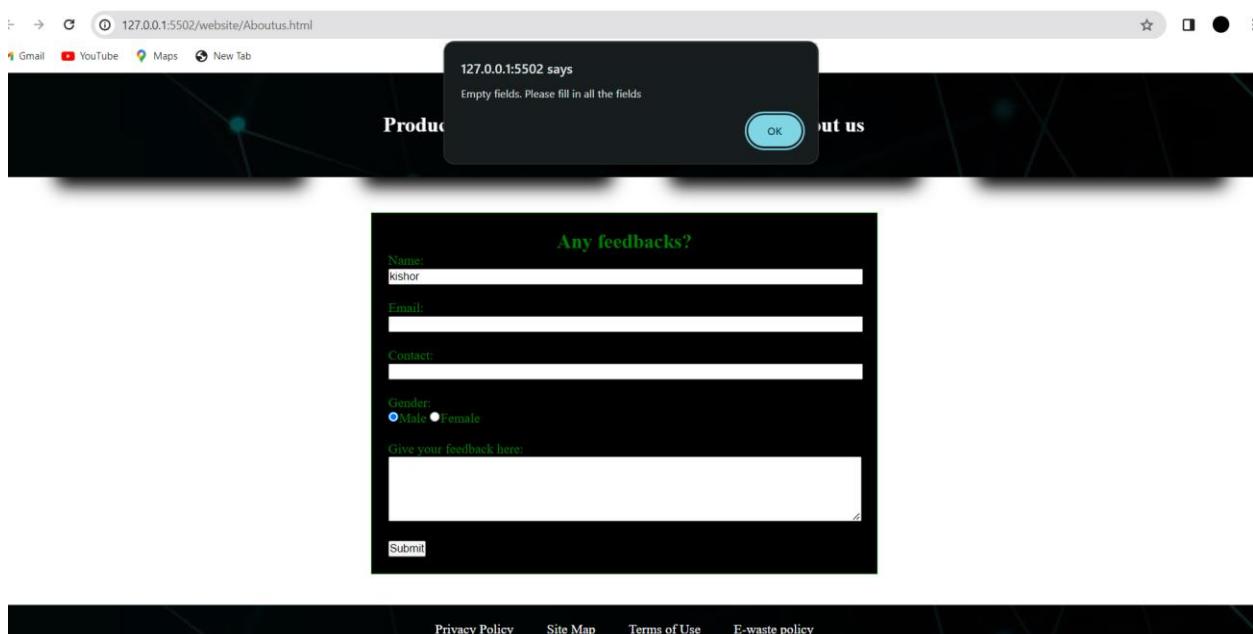

Figure 28: Testing 1

### 10.4 Test 4

Objective	Nav Hover effect
Action	Navigation bar

	Product Research Logo Blog About us
Expected Result	When we click the navigation bar. The color of the navigation bar change into green and hover.
Actual Result	Navigation bar color change into green and hover.
Test	The test was successful.

Table 2: Nav Hover effect

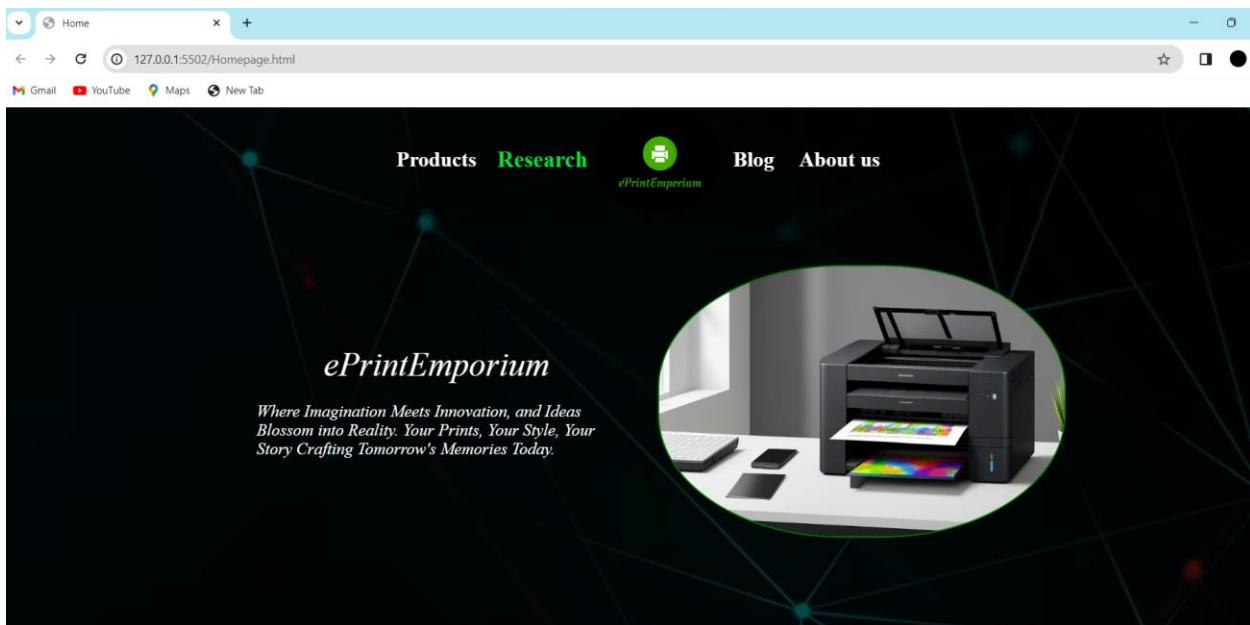

Figure 29: Testing 4

## 10.5 Test 5

Objective	Internal + External link
-----------	--------------------------

Action	<p>External link</p> <p>Href=linkedin profile</p> <p>Href=facebook profile</p> <p>Href=Instagram profile</p> <p>Internal link</p> <p>Home page to any pages/any pages too any pages</p>
Expected Result	When we click any navigation bar we redirect to that page.
Actual Result	Navigation bar was clicked and got redirect to that page
Test	The test was successful.

## 11. Conclusion

In conclusion, our group has successfully developed a user-friendly printer-selling website that prioritizes customer satisfaction. With intuitive navigation, comprehensive product information, and secure payment options, we've created a platform that offers a seamless shopping experience. Our commitment to adaptability is reflected in responsive design and a willingness to incorporate user feedback. As we launch into the digital marketplace, we are confident that our website will not only meet the needs of our customers but also stay competitive by adapting to evolving industry trends.

<h2><b>About This Item</b></h2>

<ul>
<li>
    PERFECT FOR HOME - Best for printing basic color
documents like recipes, forms and travel
    documents. Print speeds up to 8.5 pages per minute in
black or 5.5 pages per minute in
    color..Operating temperature range : 41 to 104°F / 5 to
40°C
</li>
<li>
    KEY FEATURES - Print, copy and scan in color, auto
document feeder, mobile fax, mobile and
    wireless printing
</li>
<li>
    INCLUDES FREE HP+ SMART FEATURES - Upgrade free to HP+
during setup to get advanced features for
    mobile printing, security, automatic updates and more.
HP+ only works with an HP account,
    internet connection and Original HP Ink for the life of
the printer.
</li>
<li>
    CONNECTIVITY - Dual-band Wi-Fi with self-reset
automatically detects and resolves connectivity
    issues. Also includes USB 2.0 port.
</li>
<li>
    HP SMART APP - Simple, step-by-step guided setup. Print,
scan, and copy everyday documents from
    your phone-from anywhere. Get advanced features with HP+
in the Smart app including mobile fax
    and advanced scanning features such as multi-item
recognition
</li>
```

## Introduction of Information System

```
<li>
    3 MONTHS OF INSTANT INK INCLUDED WITH HP+ – Print up to
700 pages a month and get ink delivered
        only when you need it. After 3 months, monthly fee
applies unless cancelled, and you'll save up
            to 50% on ink.
</li>
<li>
    This printer is intended to work only with cartridges
with original HP chips or circuitry and
        will block cartridges using non-HP chips or circuitry.
Periodic firmware updates will maintain
            the effectiveness of these measures.
</li>
</ul>

## Introduction of Information System

Produce high-quality printing with this Brother laser all-in-one printer. The print speed of up to 36 pages per minute and automatic duplex printing produces documents fast, while the 250-sheet paper tray lets you handle demanding print jobs easily. This Brother laser all-in-one printer features a 2.7-inch color touchscreen, which ensures seamless setup and navigation, and the 50-sheet automatic document feeder allows hands-free operation.

</li>

<li>

ENSURE OPTIMAL AND UNCOMPROMISING PERFORMANCE: When it's time to replace your toner, be sure to choose Brother Genuine TN730 Standard or TN760 High-Yield replacement cartridges. And with Refresh EZ Print Subscription Service, you'll never worry about running out of toner and you'll enjoy savings of up to 50%<sup>(6)</sup> on Brother Genuine Toner. Get started with Refresh today with a Free Trial.<sup>(7)</sup>

</li>

<li>

PRINT MORE, WAIT LESS - Engineered for increased efficiency with class leading class print speeds of up to 36 pages per minute<sup>(1)</sup>.

</li>

<li>

DYNAMIC FEATURES MEET YOUR EVOLVING NEEDS - The 250-sheet paper capacity helps improve efficiency with less refills and the manual feed slot offers professional prints on a variety of papers and sizes, such as card stock, envelopes, etc.

</li>

<li>

ENGINEERED FOR PRODUCTIVITY - Helps save time with single-pass duplex (2-sided) copying and scanning via up to 50-sheet automatic document feeder, offering multi-page copy, scan & fax.

</li>

</ul>

<h2><b>About This Item</b></h2>

<ul>
    <li>
        Never run out of ink. Connect your printer to Alexa and
        receive notifications when you're
            running low. Alexa can even place a smart reorder from
        Amazon on your behalf, if you enroll in
            smart reorders
    </li>
    <li>
        Enrolling in Smart Reorders with Alexa ensures that you
        never have too much or too little ink
            supplies. No subscription needed.
    </li>
    <li>
        Wireless 3-in-1 (Print | Copy | Scan)

<h2><b>About This Item</b></h2>

<ul>
    <li>
        To deliver prints more economically, all you have to do
        is press the One Touch Eco button to
            switch to the Eco mode. This mode lets you conserve
        toner, paper and energy. This useful feature
            prevents you from having to waste time making changes to
        settings or altering your documents.
    </li>
    <li>
        This printer is designed with Samsung's Easy Eco Driver
        that lets you adjust the color, quality
            and other settings before you print your document. You
        can get rid of any unnecessary images or
            texts. You can even monitor savings and say goodbye to
        all wasted printouts.
    </li>
    <li>
        With 3 in 1 functionality, this versatile printer is just
        what you need in your office if
            printing, copying and scanning are things that you do on
        a regular basis. The printer also has
            various innovative features like PC fax functionality, ID
        copy, scan-to-email and N-up copy,
            which makes it very useful for offices and businesses.
    </li>
    <li>
        Designed in a compact way, this printer is not just space
        saving and easy to install but also
            highly portable. The contemporary design makes it go well
        with modern office interiors.
    </li>
</ul>

<h2><b>About This Item</b></h2>
```

## Introduction of Information System

```
<ul>
    <li>
        [No App or Computer Required]: This intelligent handheld inkjet printer adopts a upgraded powerful cortex-A9 quad core CPU and independent System that guarantee a smooth and stable operating after hours of using. NO need to be connected to APP, computer and mobile phone.
    </li>
    <li>
        [Lightweight and Convenient]: This Ergonomic handheld printer features built-in storage memory card and a rechargeable 2000mAH large-capacity battery weights 1.54LB in total, which means it's small and light to operate and print no matter whenever and wherever, with only one hand easily.
    </li>
    <li>
        [8+ Printing Contents and 10+ Printing Surface Allowed]: This inkjet printer equipped a 4.3 inch LCD touch screen (supports input/editing directly) is suitable for printing text, digital, QR code, barcode, production date, time, logos on the surface of paper, boards, carton, stone, pipe, cable, metal, glass, plastic, cloth etc directly. 25 Languages available and 360 degree all-round printing supported along with the positioning plates. The height can be 2-12.7mm, and length is not limited.
    </li>
    <li>
        [42ml Quick-Drying Ink Cartridge Included]: This handheld inkjet printer comes with a black original high-definition 42ml quick-drying ink cartridge that can effectively prevent from ink-leaking or nozzle-blocking problem in the maximum limit and provide excellent smooth & brightly-colored printing experience. Ink colors available: Black, white, Yellow, red, blue, green, invisible, UV.
    </li>
    <li>
```

## Introduction of Information System

```
[Professional Service and Perfect After-Sales]: We are a
professional manufacturer specializing
    in the intelligent printers research and development. It
definitely beats writing labels. Would
    recommend for any business owners that are looking for a cost
saving and reliable labeling
        solution.

<div class="class111">
    
    </div>
    <br>
    <hr>
    <hr>
    <br>
    <p id="p1">
        Technology is a powerful and ever-changing force that has become an
integral part of our daily lives,
        changing the way we live, work and interact with the world. From the
invention of the wheel to the emergence
        of the internet, all technological developments have played an
important role in shaping the course of human
        history.
        <br>
        This winter, technology has reached unprecedented heights and every
aspect of life is developing rapidly.
        Fields such as artificial intelligence, robotics, biotechnology and
the Internet of Things (IoT). These
        innovations are not only changing the way we work, they are also
redefining the nature of humanity.
        <br>
        One of the most important things in recent years is the rise of
artificial intelligence (AI). Artificial
        intelligence involves the creation of intelligent machines that can
perform tasks that often require human
        intelligence, such as visual perception, speech recognition,
decision-making, and translation. Machine
        learning is a branch of artificial intelligence that enables machines
to learn and improve knowledge without
        explicitly revealing it.
        <br>
        The Internet of Things (IoT) is another revolutionary technology that
connects everyday devices to the
        Internet, allowing them to send and receive messages. Get
information. This interconnected system enables
```

## Introduction of Information System

smart homes, cities and businesses, making them more efficient, convenient and sustainable. From smart thermometers to wearable devices, the Internet of Things is revolutionizing the way we interact with our environment.

<br>

Originally introduced as the underlying technology of cryptocurrencies such as Bitcoin, blockchain technology has also found applications beyond finance. Its distribution and security make it suitable for many industries, including supply chain management, healthcare, and voting.

<br>

Biotechnology is doing great work in areas such as genetic engineering, personalized medicine and CRISPR gene editing. These advances have the potential to revolutionize healthcare by providing targeted therapies and genetic treatments.

    It is undeniable that technology has brought many positive changes to
every aspect of human life. In
    communications, global communication enabled by the Internet has
changed the way people interact, fostering
    instantaneous communication and collaboration on a scale
unprecedented in the world. Social media continues
    to facilitate this connection by allowing people to share their
experiences and connect with friends and
    family around the world. Technological advances in medicine have
influenced medical research, improving
    diagnosis, treatment and patient care. The advent of telemedicine has
increased the accessibility of
    healthcare through remote consultations and monitoring. The education
sector has undergone a transformation
    with the rise of e-learning platforms and digital tools, making
learning easier and more convenient.
    Industry is driving growth through technology automation and
increasing the productivity of many industries.
    In addition, technology has greatly benefited the quality of life
thanks to the use of technology for the
    disabled and smart home innovations. From renewable energy to
environmental protection, technology plays an
    important role in solving environmental problems. Finally, in
scientific research and innovation, science
    and technology advance, yield new discoveries and advances, and
benefit the entire society.

    Although technology has many positive benefits, it also brings with it a number of negative effects that
    need to be considered. A major concern is the erosion of privacy and increased surveillance facilitated by
    technology. From data breaches to monitoring of online activities, individuals are at risk of privacy
    breaches. While the rise of automation increases productivity, it also threatens employment in some
    industries, leading to job losses and economic inequality.
    Additionally, the prevalence of misinformation
    and the ease with which fake news spreads on digital platforms creates social problems that undermine trust
    and influence public debate. Technology is another issue, especially among young people, with too much
    screen time and digital addiction affecting mental health.
    Environmental impacts such as e-waste and the
    carbon footprint of data centers highlight the ecological costs of our digital lives. In addition, the
    digital divide increases social inequalities and makes it harder for communities to access education and
```

        financial opportunities. Addressing these negativities as we embrace
technology is important to ensure
            balance and integration of technology in our lives.

## Introduction of Information System

efficiency and productivity of various industries, promote economic growth and innovation. Technology in communications has connected the world at an unprecedented rate, supporting global collaboration and instant exchange of information. Technological advances in medicine have led to improvements in clinical research, personalization, and patient care. The educational landscape has changed with the emergence of e-learning platforms and digital tools that make information more accessible and adaptable to different learning styles. It also plays an important role in solving environmental problems through innovations in technology, renewable energy, resource management and environmental protection. From business automation to smart homes, technology is becoming a major force in shaping the future. Harnessing and using the potential of technology is important for driving around the world, improving quality of life and solving difficult problems. As we move towards an ever-evolving technological environment, reflection and ethics are vital to ensure that these advances contribute to human well-being.

<br>

In addition, the importance of technology continues to support finance and create new opportunities. Automation and digitalization have transformed the business, increasing efficiency and reducing costs, thereby increasing business growth and competitiveness. E-commerce platforms open up the global marketplace for businesses of all sizes, leveling the playing field and supporting the broader economy. In scientific research and innovation, technology has accelerated the pace of discovery; He made groundbreaking developments in medicine, scientific literature and many other fields. This not only improves our understanding of the world, but also leads to practical applications that improve the human condition.
